PREPARATION FOR HEALTH SCREENING
體檢注意事項

1. For treadmill, bring exercise shoes and clothing 請攜帶運動鞋和輕便衣服
2. Fast 6-8 hours before (except water) 六至八小時前請勿進食(水除外)

1. **Tumor Markers** – Biomarkers C12 is based on the latest protein chip biotechnology for the detection of 12 tumor markers simultaneously. Studies have shown that multi-tumor markers have higher sensitivity and specificity than single-tumor marker. For more details please visit www.ScreenOnCancer.com.
2. **CVS (Cardiovascular) risk** – Family history of heart diseases, hypertension, diabetes mellitus, high cholesterol & smoking.
3. **Cancer risk** – Family history of cancer, previous cancer, weight loss, smokers, prolonged cough, change in bowel habits. The screening tests for cancer are not exhaustive and do not necessary detect all cancers. As with good medical practice, clinical correlation and continuous surveillance is necessary.
4. **Comprehensive blood & urine tests** (Total 66 tests)- blood group, full blood count, renal function, diabetes screening, lipid studies, urinalysis, hepatitis studies, H.pylori, T4 and HN.
5. **Fort Test** – Free Oxygen Radicals test.
6. **Global Risk Score (GRS)** – a tool that looks at a person's risk factors (including calcium score result), weight them in importance and then gives a percentage risk of that patient having a heart attacked or stroke within the next 10 years.
7. **Heart Upgrade Option** – depending on results for evaluation of blood vessels after bypass surgery, balloon angioplasty or stenting and for evaluation of coronary artery blockage if stress test of coronary calcium scan abnormal. The upgrade price does not apply to Stand-alone MSCT Coronary Angiogram.
